

New Green Energy Icon for Eco Friendly Life

With the ubiquitous portable 3C devices in our daily life, safety and extending battery is always the issue for any portable devices. Universal portable charger is your backup battery for any 3C devices. The feature of portable charger is not only lightweight and ready to use any time at anywhere, but also charge all your 3C devices from this original adaptors and cables. Enclosed with our tips for different brands and types of devices, you can just easily plug in and charge and discharge at the same time. When you have a trip with your family, what you need to do is to bring the charger and the tips you need without extra AC adapters and messy cords. By reducing the usage of the cables for each electronic devices, we are able to make ourselves a better and more eco friendly environment.

Having the belief and concern about our planet, XPAL Power insists to be professional in battery and responsible in green industry for our better life. XPAL's external chargers accomplish the universal concept which diminishes the waste of our cables and improves our environment. Shelly Yeh, the Chairperson of Tsemich Intl Corp. said, "Everyone has responsibility to protect the environment we live. In terms of the concept of user friendly, we hope that through

universal chargers, we are able to reduce the waste and more concern of our planet. What we can do now is to make our planet better." Shelly Yeh also indicates that most people now know how to do the recycle and reduce waste. However, it is still lack of support and execution from government in electronic industry, for instance, recycle programme of electronic products. More importantly, the most difficult first action is to change consumer's habits. "There are always additional cables and cores whenever we renew our 3C devices. There must be loads of extra chargers and cables for each device for several years." According to a survey from EU, 12 hundred million of mobile phones were sold in 2008, along with 82,000 tons of batteries and chargers, not to mention the gaming devices, digital cameras,

camcorders, and laptops. "We hope to change the concept of battery, which worsen our environment. Portable chargers are able to reuse and reduce waste. XPAL Power also provides global services of recycling battery cell programme. Once you have our universal battery, you can change our battery cell without changing the entire charger. This is also a concept of reusing and reducing. Furthermore, we offer FREE TIPS FOR LIFE programme for your updated electronic devices every year.

What is portable charger?

Portable Charger is a new concept which changes people's habit of charging your portable electronic devices. The concept of the design is similar to batteries.

Portable charger saves your power in a special pack and supplies the energy whenever you need.

Why portable charger?

Ready to use - Comes pre-charged out of the box. Easy to use - Just plug it in for instant power. Stay charged - Maintains charge for up to 1 year. Lightweight - No more bulky AC adapters and messy cords. Powerful - charges and power 2 to 3 different devices at the same time.
